

Ohlhorst Africa is one of the largest tiling and plastering contractors and suppliers in Africa, working across the continent on major commercial projects. Established in the 1940s, Ohlhorst Africa has proudly maintained excellence in quality workmanship and continues to grow relationships with the top names in the construction industry.

With head offices in South Africa and regional offices in Mozambique, Botswana and Namibia, our hands-on approach ensures a consistent standard of excellence across all our projects. Working closely with over 300 highly qualified employees across Africa, we have successfully completed projects in the following countries:

- Namibia
- Botswana
- Zambia
- Seychelles
- Mauritius

In spite of our size, however, Ohlhorst Africa remains a family business – tiling and plastering is in our blood.

## Company Structure & Services

Since inception our focus has been quality workmanship, and developing quality, ethical relationships with clients, contractors, subcontractors and suppliers. We cover the risk of installation, ensuring a top quality finish, backed by professional service.

Our stable company history provides peace of mind in the knowledge that warranty on materials and installation will be honoured. This is particularly important in high impact installations requiring extended backup plans and guarantees on workmanship.

Over the years as our interests have grown, we have expanded our fields of expertise from tiling and plastering to include tile supply, marble and granite and lightweight building solutions.

## Tiling and Plastering

Ohlhorst Africa fulfils tiling and plastering contracts throughout Africa. On-going relationships with the top names in the construction industry ensure our involvement in many of the continent's major commercial projects.

### Services

#### *Tiling:*

## Tile Supply

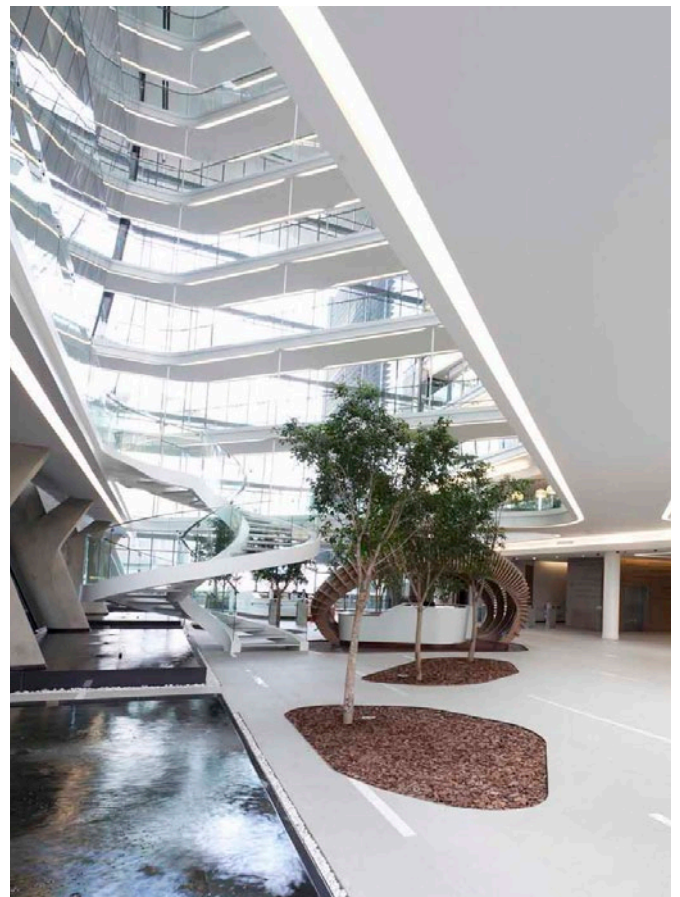

The Group's tiling supply division is fast becoming the leading supplier of wall and floor tiles to the commercial sector. We successfully import tiles from the East and have established relationships with a number of prominent factories in Spain, Italy, Malaysia and China, as well as other parts of the world.

We aim to offer an exclusive range of products and expert advice on selection, installation and maintenance of all our products which is critical to a professional result.

## Expert advice & Consulting

Our team of highly trained tile specialist consultants will assist you with:

- Sourcing of the perfect tiling product, matching our tiles to your need
- Selecting the correct product for every application
- Trending and latest technologies
- Advising on sourcing complimentary accessories
- Advising on product maintenance
- Full service process management from order to delivery of your tiles to site on time
- Advice and specification of suitable adhesives, as well as appropriate methodologies
- Advice on in situ finishes methodologies
- Advice on maintenance of finished surfaces

## Marble & Granite

The successful use of natural stone requires an in-depth knowledge and understanding both of materials and fixing methods. Our technical team and specialist consultants are fully conversant with every aspect of cladding and flooring in these materials and have all the skills and experience required to produce a high quality finishes.

### Our services include:

- Cladding systems including engineer certified design in stone or engineered products.
- Initial design and provision of shop drawings
- Selection of materials from a wide variety of local and international stone
- In-house production facilities fully equipped with water-jet cutters, bridge saws, polishers and other beneficiating machinery
- Stone counters, stairs, vanities and features
- In-situ polished stone floors

## Lightweight Building Solutions

Our Lightweight Building Solutions division allows us to provide the building and construction industry an array of award-winning construction technologies. Using lighter, durable materials, prefabrication of construction elements according to your specifications offers freedom of architectural and technical designs while decreasing construction time and structure weight load.

Lightweight Building Solutions can design and construct commercial interiors, facades or whole buildings from lightweight, green certified materials.

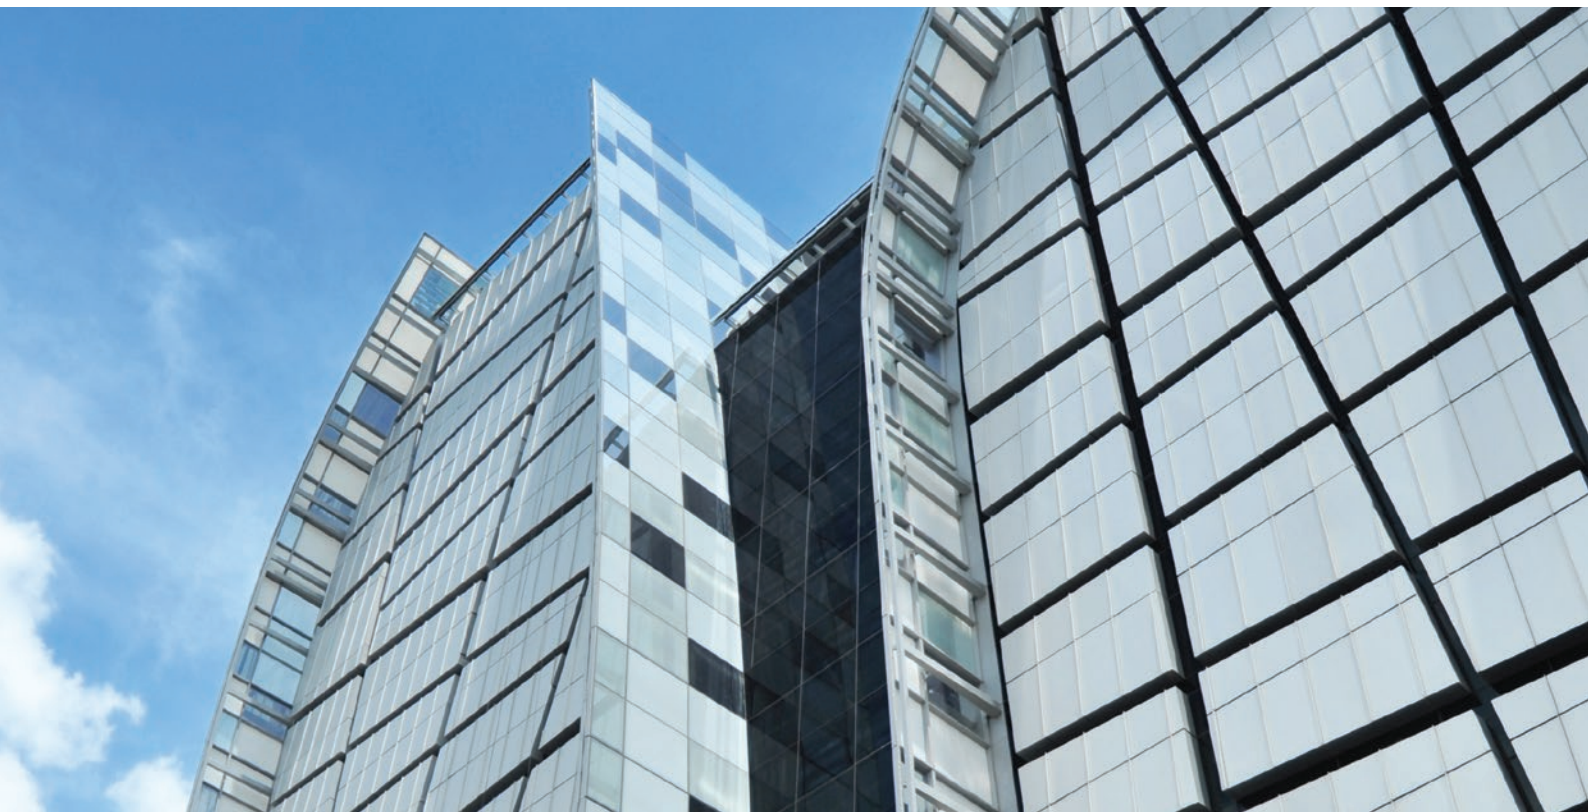

### Our services include:

- Design and construction of commercial facades from lightweight, green certified materials
- Design and specification of entire steel superstructures
- Manufacture of all lightweight building components to specification
- Redesign of any traditional architectural design to light steel superstructure with structural engineering certificate for the structure
